

Officials' Guidance 2017-2020 Cycle

Execution

Execution judging is very similar under the new Code of Points, with the main exception being that **travel** is no longer deducted for. This will now be the responsibility of the Horizontal Displacement (H) judges.

Generally:

Deduct per element for lack of form/control: 0.0 - 0.5

Out-bounce:

There is now an additional 0.1 deduction available at the end of the routine where there is an **uncontrolled out-bounce**. This deduction is in addition to the 0.1-0.2 available for the end-of routine stability deductions. There can therefore be a total of **0.3** deducted for the end of the routine. If the out-bounce is non-deductible, the maximum shall remain as 0.1 or 0.2.

'Uncontrolled' can mean multiple arm swings, cycling legs, or uncontrolled piking, as examples.

End-of routine deductions:

These were previously given to you by the chair. While the chair may still direct you, you are now responsible for knowing and applying these yourself:

After landing...

Touching (not falling onto) the bed with one or both hands - 0.5

Touching or falling to the hands, knees, hands & knees, front, back or seat - 1.0

Touching/stepping onto anything other than the bed - 0.5

Landing/falling outside the bed or leaving the trampoline - 1.0

Performing a 'whipped' additional somersault due to instability - 1.0

Penalties

The Chair and Difficulty Judges will make additional penalties that were previously given to the execution judges. As a result, do not make any additional deductions or penalties unless directed to do so by the Chair.
